CHRISTMAS TREE PLANTING STOCK ONE OF OUR SPECIALTIES. Good trees bring satisfactory prices. Each year the public is becoming more choosy. They want the best, such as select trees, plantation grown.

Annually over 30 million trees are cut to supply the Christmas Tree Trade having a value of over 50 million dollars. On our farms each year acres are becoming idle not suited for farm crops. These idle acres can produce a paying crop of Christmas Trees. Planting $6\frac{1}{2} \times 6\frac{1}{2}$ feet apart, requires approximately 1,000 trees per acre of ground — average cost of trees about \$20.00 — cost of planting, \$10.00. Total cost per acre, \$30.00.

The Christmas Tree Growing is a business only about 30 years old. A tree from the Christmas tree farms is rapidly taking the place of the trees shipped in from Canada, and some of the northern states in the U. S. Growing trees near our big Christmas Tree Markets saves in handling, trucking, paying freight, etc., beside the Canadian trees have to be cut so early in the season that very many trees are very unsatisfactory for the trade.

UNADILLA NURSERY FARMS

750-758 Riverside Drive
Johnson City, N. Y.

AT YOUR SERVICE — 43 YEARS WITH THE BEST — DIAL 7-5752

YOUR CHRISTMAS TREE IS A SYMBOL OF HOPE, OF PEACE ON EARTH, OF GOOD WILL TOWARDS ALL MEN.

PLANTING CHRISTMAS TREES

When Your Christmas tree arrives from the nursery, open the crate or package. Dip the roots in a dish of very heavy mud, lay the trees in a shallow trench and cover with fine top soil. Do not cover foliage. Your trees will be O.K. for several days. Take trees from trench only as needed. If you are planting in a grassy field use mattock or pick-ax to make the holes, insert tree roots, stepping on dirt, setting about one inch lower than tree grew in nursery.

DISTANCES APART

Plant $6\frac{1}{2}$ feet apart, 1,000 per acre . . . $4\frac{1}{2}$ feet apart, 2,000 trees per acre. Well to line out the field with stakes using a line for guide, always planting on the same side of line.

For better lawns use the UNADILLA LAWN SEED FORMULA. Over the years we have formulated a turf mixture we believe to be the best and most economical. We are selling this mixture in 25 and 50 pound sacks at \$1.00 per lb. delivered.
